Subject: Notice on Attending Conferences

Importance: High

Dear all,

It has come to our attention that quite a number of students applied to attend conferences at their home countries.

Main objective of attending and presenting the research papers at conferences is not only to exercise the sharing of knowledge, but also to connect and to do networking with respective researchers/colleagues around the world.

With that spirit, everyone is highly encouraged to broaden the horizons by giving the priority to attend any conferences held in countries other than your own.

Please take the opportunity to experience new environments, new cultures & meeting new people!

All the best,

DEPUTY DEAN (POSTGRADUATE)
Faculty of Computer Science & Information Technology
