The 4th International Conference on the Advancement of Materials and Nanotechnology (ICAMN IV) will be held on the beautiful tropical island of Langkawi, Malaysia, on 9th to 11th November 2016. ICAMN IV aims to provide a platform for scientists, technologists and researchers to present and discuss the advancements, latest techniques, methods, characterization and functionalities of materials in the experimental as well as theoretical areas. It is also to bring together leading scientists and researchers for exchange of views, experience and research results thus providing opportunities for networking and scientific collaborations in all areas related to advanced and nano materials as well as devices.
