The banner features the Fortinet logo in the top left. The main title 'Security 361°' is in large red font, with 'The New Order of Security' below it in white. The subtitle 'Securing Your Journey Towards IoT and Beyond' is in green. The background is a dark blue network of glowing nodes and lines, with labels for 'Internet of Things', 'Social Media', 'Threat Intelligence', 'Connected Devices', and 'Cloud Computing'.

September 24, 2014 | **Le Meridien Kuala Lumpur** | **Clarke Ballroom, Level 6**

Dear Siti Salwah Salim,

Business models are changing, so are enterprises' security measures. From passive resistance, firms have moved on to proactive defence and leveraging security for business enablement.

Within the next year or two, the Internet of Things (IoT) will be among us. Enterprises will need to meld connected devices management with their cloud, social networking and threat intelligence strategies. Nothing short of a single, coherent framework will help them deal with increasingly complex threats that organisations face everyday.

The theme for Fortinet's Security 361° Symposium this year is Securing Your Journey Towards IoT and Beyond, and we will be shedding light on the IoT phenomenon and its security implications for businesses in the region and beyond.

We will also unveil a threat mitigation framework that enterprises can use to deal with advanced persistent threats (APTs), zero day attacks and other sophisticated malware. Leveraging on this framework, firms can analyse, plan and take action to protect the organisation against future attacks.

Register and attend the symposium to receive an exclusive Security 361° toolkit to help you analyze, plan and act to protect your network.

LUCKY DRAW GRAND PRIZE
Stand a chance to win iPhone 6 at our lucky draw.

EARLY BIRD PRIZES TO BE WON
Be the 1st 5 delegates to turn up at our seminar and receive a Jabra Bluetooth Earpiece (worth US\$63)

TIME	AGENDA	PRESENTER
