Study at JAIST

Calling all potential Malaysian graduates with interest in Science and Technology (S&T) to further study at Japan Advanced Institute of Science and Technology (JAIST).

JAIST was founded in October 1990 as the first independent national graduate school, to carry out graduate education based on research at the highest level in advanced science and technology.

JAIST has concluded MoU with Universiti Kebangsaan Malaysia ([UKM](#)), Universiti Malaysia Sarawak (UNIMAS), Universiti Teknologi Malaysia (UTM), Universiti Malaya (UM), Universiti Teknologi Mara (UiTM), Universiti Sains Malaysia (USM), Universiti Teknikal Malaysia Melaka (UTeM) and recently with Universiti Malaysia Sabah (UMS).

Therefore JAIST would like to invite potential graduates to explore JAIST web site for information about the masters and doctoral programs. As you learn more of what the school can offer, you may contact faculty members whose specialties match your interests and discover the possibilities of graduate work at JAIST.
